MADE IN THE U.S.A.

MGA SAW K™

7.62x51mm configuration

The MGA SAW-K™ is a compact, light weight, multi-caliber solution to the squad automatic weapon. Weighing just 14 lbs unloaded, measuring 32" long with the stock unfolded and only 25" folded combined with an ergonomic rail system and optic friendly butt stock, the MGA SAW-K™ is the lightest multi-caliber belt fed machine gun in existence.

The MGA SAW K™ is also 98% parts compatible with the standard Mk48, with the only re-sized parts proprietary to the MGA SAW K™ being the barrel, gas tube, and operating rod. Any MGA SAW K™ can be converted to any supported caliber with the appropriate caliber conversion kit.
